

Karissa Lange

Software Engineer

PROFESSIONAL EXPERIENCE

Software Engineer at 100Devs

January 2023 - Present

- Use best practices to build full stack client/server applications
- Create mobile responsive designs, built wireframes, and developed prototypes for client and open source web applications
- Handle data storage through MongoDB
- Integrate connections to REST API's for website applications

Pothos Plant Store (Full Stack Website)

Developed a full-stack e-commerce website focusing on user experience, responsiveness, and web accessibility standards. Implemented admin interface enabling product database management.

Turn on the Light Website

Collaborated with clients to design and execute a new multi-page website. Produced interactive features, including registration forms, event schedules, and speaker profiles, using SEO strategies to boost site traffic.
